**Subject:** Lazy J Tavern Landfill Verification

FYI, I checked on the landfill being used for the Lazy J Tavern site disposal, and confirmed they are licensed to accept asbestos waste.

In the initial notification to EPA, contractor Pacific Technologies selected the Ada County Landfill. In the revised notice dated 4/21/15 they switched to the Idaho Waste Systems, aka, Simco Regional Landfill 25 miles east of Boise. <http://www.idahowaste.com/>

I spoke with manager Randy Avery and he confirmed they are a licensed Subtitle D Landfill and can receive asbestos. He said that he would call me if he saw any problems with the waste loads coming into his facility.
